Title:

Link to File

The image shows a rich text editor interface. At the top is a toolbar with various icons for text formatting (bold, italic, underline, strikethrough), alignment (left, center, right, justified), bulleted and numbered lists, indentation, and text color. Below the toolbar are dropdown menus for paragraph style, font name, and font size. The main content area contains three paragraphs of text. The first paragraph describes EZ-Association as an online web site development system. The second paragraph provides instructions for logging in as a demo user. The third paragraph states that all data is pulled from the administration section. At the bottom of the editor is another toolbar with icons for undo, redo, and zoom, with a 'Zoom' dropdown menu.

Body:

EZ-Association is an online web site development system designed for small and mid-sized associations and member based organizations. It is designed to be maintained by your association - not a webmaster or programmer.

To experiment with how easy it is, **select User/Login** from menu above, and login as a demo user by using **demo as the email** and **demo as the password**. Select User/Logout to return here.

EZ-Association is a content management system. All data displayed on every screen is pulled from data entered or uploaded via the administration section of the web. This includes the graphics, colors, text and files you see here.

This web site is built using EZ-Association. Many associations are currently using versions of EZ-Association. A few are available to the public. They are:

- **Title** - Enter the Title of the content. This will be displayed at the top of the screen in bold
- **Sub-Title** - This is optional
- **Body** - This is where the information is entered. You can create lists, tables, change colors and fonts, link to other content and images
- **Required Role(s)** - This is optional. By default all users can view content. When a required role selected, only authenticated users assigned that role can view the content
- **Tags** - This is optional. Tags allow you to "mark" or identify content different ways. Tags are created by you.
